EARTH SCIENCES HISTORY

Volume 25, Number 1, 2006

TABLE OF CONTENTS

Editorial: <i>Earth Sciences History</i> : 25th volume	
Patrick N. Wyse Jackson	3
Articles	
The pre-modern history of the post-modern dinosaur: phases and causes in post-Darwinian dinosaur art	
Warren D. Allmon	5
Joseph Silas Diller (1850–1928): pioneer of southern Cascadian geology, California and Oregon	
K. R. Aalto	37
Charles Lyell, geologic change and the “causes now in operation”	
John A. Breyer	57
The Rush started here II: hard rock gold mining in North Carolina, 1825 to 1864	
Elizabeth Hines and Michael Smith	69
Jean-Henri Hassenfratz, corestone boulders and the two-stage or etch concept of landform development	
C. Rowl Twidale	107
Marlies Teichmüller (1914–2000): a successful woman geologist and the Berlin School of Organic Petrology	
Barbara A. R. Mohr and Annette Vogt	117
Pehr Kalm: a Swedish naturalist’s geological observations in North America, 1748–1751	
Daniel F. Merriam	141
Essay Review	
David Caffey, <i>Frank Springer and New Mexico, From the Colfax County War to the Emergence of Modern Santa Fe</i>	
William I. Ausich	155
Book Reviews	
Dan O’Neill, <i>The last giant of Beringia: the mystery of the Bering Land Bridge</i>	
Alwynne B. Beaudoin	159

B. P. Radhakrishna, <i>Random Harvest: biographical sketches</i> Rasoul Sorkhabi	161
Spencer G. Lucas, <i>Chinese fossil vertebrates</i> David A. E. Spalding	163
Henry Darcy, <i>The public fountains of the City of Dijon</i> Stanley N. Davis	164
A. J. Bowden, C. V. Burek and R. Wilding, <i>History of Palaeobotany: selected essays</i> Ellis L. Yochelson	167
Allan Mazur, <i>A romance in Natural History; the Lives and Works of Amadeus Grabau and Mary Antin</i> R. L. Langenheim, Jr.	168
Gerhard Maier, <i>African dinosaurs unearthed. The Tendaguru Expeditions</i> David A. E. Spalding	170
Hakuyu Okada with Alec Kenyon-Smith, <i>The Evolution of Clastic Sedimentology</i> Gerard V. Middleton	173
Wolf von Engelhardt, <i>Goethe im Gespr�ch mit der Erde: Landschaft, Gesteine, Mineralien und Erdgeschichte in seinem Leben und Werk</i> E. P. Hamm	175
Ann Moyal (selected, edited and footnoted by), <i>The Web of Science: the scientific correspondence of the Rev. W.B. Clarke, Australia's pioneer geologist</i> David Branagan	177
Interesting Publications	
Gerald M. Friedman	180
Notes on Contributors	189
HESS Subscription details	191
ESH back issue information	192

EDITORIAL

EARTH SCIENCES HISTORY: 25TH VOLUME

PATRICK N. WYSE JACKSON

Editor, EARTH SCIENCES HISTORY

*Department of Geology, Trinity College, Dublin 2, Ireland
wysjcknp@tcd.ie*

This issue of *Earth Sciences History* marks a milestone in that the journal has now reached its 25th volume. This is a significant anniversary and testifies to the vision and hard work of its founding editor Gerry Friedman and successive editors Mott Greene and Greg Good. Of course a journal is not simply the product of the Editor, and all have been ably assisted by, in the first place an Editorial Board (1982–2000), and since 2001 by a skilled and knowledgeable group of Associate Editors, and all the time backed up by successive HESS officers. However, a journal cannot survive twenty-five years, let alone a few, if it was not for the continued support of its readers and subscribers, many of whom I imagine have a full run of the journal. Your support is greatly appreciated.

Of greatest importance to a journal in terms of input and effort is that provided by the contributors of papers and reviews to the journal, and the efforts of the reviewers of those contributions. In these days of continued reevaluation of the educational and research role of the university sector and the seemingly unending research-evaluation exercises, it often transpires that we have less time to carry out the research that our assessors wish to evaluate. I am pleased to report that a steady stream of papers continue to land on my desk and on those of the Associate Editors. There are still researchers willing to find the time to research and write about the subject that they love. Thank you—without these papers *Earth Sciences History* would simply not exist. Long may you all be stimulated to write and submit papers, even though I know that to do this many of you have to carry out research outside of normal working hours (I do much of my research and editing in the early hours).

Earth Sciences History provides a valuable, and unique forum for dissemination of research scholarship in the field of the history of the Earth Sciences (in its broadest sense). Long may it continue, and we look forward to the next 25 volumes!
